MATHEMATICS SPECIALIST UNITS 1 AND 2
Section One:
Calculator-free

If required by your examination administrator, please place your student identification label in this box

Student Number: In figures

In words   _____

_____

Time allowed for this section
Reading time before commencing work: five minutes
Working time for this section: fifty minutes

Materials required/recommended for this section
To be provided by the supervisor
This Question/Answer Booklet
Formula Sheet

To be provided by the candidate
Standard items: pens (blue/black preferred), pencils (including coloured), sharpener,
                 correction fluid/tape, eraser, ruler, highlighters

Special items: nil

Important note to candidates
No other items may be taken into the examination room. It is **your** responsibility to ensure that you do not have any unauthorised notes or other items of a non-personal nature in the examination room. If you have any unauthorised material with you, hand it to the supervisor **before** reading any further.

Structure of this paper

Section	Number of questions available	Number of questions to be answered	Working time (minutes)	Marks available	Percentage of exam
Section One: Calculator-free	8	8	50	53	35
Section Two: Calculator-assumed	13	13	100	100	65
			Total	153	100

Instructions to candidates

1. The rules for the conduct of Trinity College examinations are detailed in the *Instructions to Candidates* distributed to students prior to the examinations. Sitting this examination implies that you agree to abide by these rules.

2. Write your answers in this Question/Answer Booklet.

3. You must be careful to confine your response to the specific question asked and to follow any instructions that are specified to a particular question.

4. Spare pages are included at the end of this booklet. They can be used for planning your responses and/or as additional space if required to continue an answer.
   - Planning: If you use the spare pages for planning, indicate this clearly at the top of the page.
   - Continuing an answer: If you need to use the space to continue an answer, indicate in the original answer space where the answer is continued, i.e. give the page number. Fill in the number of the question that you are continuing to answer at the top of the page.

5. **Show all your working clearly**. Your working should be in sufficient detail to allow your answers to be checked readily and for marks to be awarded for reasoning. Incorrect answers given without supporting reasoning cannot be allocated any marks. For any question or part question worth more than two marks, valid working or justification is required to receive full marks. If you repeat any question, ensure that you cancel the answer you do not wish to have marked.

6. It is recommended that you **do not use pencil**, except in diagrams.

7. The Formula Sheet is **not** to be handed in with your Question/Answer Booklet.

See next page

Section One: Calculator-free   **(53 Marks)**

This section has **eight (8)** questions. Answer **all** questions. Write your answers in the spaces provided.

Working time for this section is 50 minutes.

Question 1   **(5 marks)**

(a)   If $\tan A = \frac{1}{2}$, determine the exact value of $\tan 2A$.   (2 marks)

(b)   Solve $\cos\big(2(x - 10°)\big) = 0.5$, $0° \leq x \leq 180°$.   (3 marks)

Question 2   **(6 marks)**

If $A = \begin{bmatrix} 2 \\ 1 \\ 3 \end{bmatrix}$, $B = \begin{bmatrix} 4 & -1 & 2 \end{bmatrix}$, $C = \begin{bmatrix} 3 & 3 & -2 \\ 5 & 4 & -3 \end{bmatrix}$ and $D = \begin{bmatrix} 1 & 2 \\ 4 & 0 \\ 7 & 3 \end{bmatrix}$, state whether the following are true or false. If false, clearly explain your reasoning.

(a) $A + D = \begin{bmatrix} 2 & 1 & 2 \\ 1 & 4 & 0 \\ 3 & 7 & 3 \end{bmatrix}$.   (1 mark)

(b) $AB = \begin{bmatrix} 8 & -2 & 4 \\ 4 & -1 & 2 \\ 12 & -3 & 6 \end{bmatrix}$.   (1 mark)

(c) $a_{12} + b_{21} + c_{11} + d_{22} = 3$.   (1 mark)

(d) $BA = 13$.   (1 mark)

(e) $CD = \begin{bmatrix} 1 & 0 \\ 0 & 1 \end{bmatrix}$.   (1 mark)

(f) $C^{-1} = D$.   (1 mark)

Question 3   **(7 marks)**

Two vectors are given by $\mathbf{a} = 9\mathbf{i} + 4\mathbf{j}$ and $\mathbf{b} = 3\mathbf{i} - 4\mathbf{j}$. Determine

(a)   a vector parallel to $\mathbf{a} - \mathbf{b}$ of magnitude 25.   (3 marks)

(b) $\mathbf{a}$ in terms of $\mathbf{d}$ and $\mathbf{e}$, where $\mathbf{d} = 3\mathbf{i} - 5\mathbf{j}$ and $\mathbf{e} = 5\mathbf{i} - 2\mathbf{j}$.   (4 marks)

Question 4   **(9 marks)**

(a)   Evaluate $\dfrac{3!\,7!}{9!}$.   (2 marks)

(b)   Determine the number of different permutations of the letters in the word NEEDLED.
   (2 marks)

(c)   A password is formed using all seven of the characters \$, %, @, Y, Z, 8 and 9 just once. Determine the number of different passwords that are possible in which all the symbols are adjacent, all the letters are adjacent and all the digits are adjacent.   (3 marks)

(d)   Determine the least number of randomly chosen integers between 10 and 99 required to be certain that the difference of the digits in at least two of the integers is the same. (*For example, the difference of the digits in the integer* 49 *is* $9-4=5$).   (2 marks)

See next page

Question 5   **(5 marks)**

A proposition states that for any integer n, if $n^2 - 4n - 3$ is even, then n is odd.

(a)   Write the contrapositive of this proposition.   (1 mark)

(b)   Use the contrapositive statement to prove the proposition is true.   (4 marks)

See next page

Question 6   **(7 marks)**

(a)   Sketch the graph of $y = 2\operatorname{cosec}(x + 90)$ for $0° \le x \le 180°$.   (3 marks)

(b)   Prove the identity $\cot A + \tan A = \sec A \operatorname{cosec} A$.   (4 marks)

See next page

Question 7   **(7 marks)**

(a)   Matrix A represents a rotation of 180⁰ about the origin. Determine

   (i)   matrix A.   (1 mark)

   (ii)   the exact coordinates of the point (-2, 3) after transformation by matrix A.   (1 mark)

   (iii)   the determinant of matrix A.   (1 mark)

(b)   Matrix $B = \begin{bmatrix} -1 & 0 \\ 0 & 1 \end{bmatrix}$. Describe the transformation represented by B and calculate its determinant.   (2 marks)

(c)   Use an example to show that two non-singular square matrices C and D exist such that the determinant of their sum is equal to the sum of their determinants.   (2 marks)

See next page

Question 8   **(7 marks)**

The complex number $z = \dfrac{1+i}{1-i} - \dfrac{4+3i}{a-i}$, where a is a real constant.

(a)   Show that $\operatorname{Re}(z) = \dfrac{3-4a}{a^2+1}$ and that $\operatorname{Im}(z) = \dfrac{a^2-3a-3}{a^2+1}$.   (4 marks)

(b)   Determine the value(s) of a when $\operatorname{Im}(z) + \operatorname{Re}(z) = 0$.   (3 marks)

End of questions.
