

# Sem 1 Examination 2010 Question/answer booklet

# MATHEMATICS: SPECIALIST 3CDMAS

Section Two (calculator-assumed)

Name:	 		
CD 1			
Teacher:			

#### Time allowed for this section

**Section Two** 

Reading time before commencing work:

Working time for paper:

10 minutes

100 minutes

### Material required/recommended for this paper

To be provided by the supervisor

Question/answer booklet for Section Two and a formula sheet (from Curriculum Council) which was provided with Section One.

### To be provided by the candidate

Section Two:

Standard items:

pens, pencils, pencil sharpener, highlighter, eraser, ruler

Special items:

drawing instruments, templates, and up to three calculators, (CAS, graphic or scientific), which satisfy the conditions set by the Curriculum Council for this course. Up to two (2) A4 pages of notes (handwritten, photocopied or typed on both sides) that may be either personally or commercially produced. *It must not be folded*,

have anything stuck to it or have correction fluid/tape on it.

#### Important note to candidates

No other items may be taken into the examination room. It is **your** responsibility to ensure that you do not have any unauthorised notes or other items of a non-personal nature in the examination room. If you have any unauthorised material with you, hand it to the supervisor **before** reading any further.

#### Structure of this paper

Section	Number of questions available	Number of questions to be answered	Suggested working time (minutes)	Marks available
Section One: Calculator-free	6	6	50	39
Section Two: Calculator-assumed	11	11	100	79
		-		118

#### Instructions to candidates

- 1. The rules for the conduct of Western Australian examinations are detailed in the *Year 12 Information Handbook 2010*. Sitting this examination implies that you agree to abide by these rules.
- 2. Answer the questions according to the following instructions.

Section Two: Write answers in this Question/Answer Booklet. All questions should be answered.

Show all your working clearly. Your working should be in sufficient detail to allow your answers to be checked readily and for marks to be awarded for reasoning. Incorrect answers given without supporting reasoning cannot be allocated any marks. For any question or part question worth more than two marks, valid working or justification is required to receive full marks. If you repeat an answer to any question, ensure that you cancel the answer you do not wish to have marked.

It is recommended that you do not use pencil except in diagrams.

- 3. You must be careful to confine your responses to the specific questions asked and to follow any instructions that are specific to a particular question.
- 4. Spare pages are included at the end of this booklet. They can be used for planning your responses and/or as additional space if required to continue an answer.
- Planning: If you use the spare pages for planning, indicate this clearly at the top of the page.
- Continuing an answer: If you need to use the space to continue an answer, indicate in the original answer space
  where the answer is continued, i.e. give the page number. Fill in the number of the question(s) that you are
  continuing to answer at the top of the page.

#### MARK ALLOCATION AND RECORDS:

### Section Two: Calculator – 79 marks

This section has eleven (11) questions. Attempt all questions.

Working time: 100 minutes

·. (	[4 marks]	
	Consider that the complex number $z$ is a function of time $t$ i.e. $z = x(t) + iy(t)$ . Prove that $\frac{d}{dt}(\text{Re }z) = \text{Re}\left(\frac{dz}{dt}\right)$ .	
		<u>-</u>
	•	
	<del>.</del>	
₹.	[s marks]	
	The locus of points $z$ in the complex plane is determined by the constraint $z\overline{z} + z + \overline{z} = 24$ . Demonstrate how to find the nature of this locu	ıs.

17)	30	marks
11./4	レクム	נ כא יטוייו

[3,2 marks]
If  $z = 4 \operatorname{cis} \theta$  and  $z = A \operatorname{cis} \left(\frac{2\pi}{3}\right)$  are two of the four, fourth roots of z, find:

		( 0 /	
(a)	exactly,	, all values of A and $ heta$ , where - $\pi \leq  heta$ $\leq$	⊊π.

 	-	 	•••		<u>-</u> -	 	
 	m=	 			 _		

(b) $z$ in exact	t polar form
------------------	--------------

### 11. [3,2 marks]

Separately sketch the following in the Argand plane.

(a) 
$$|1-z| < |z+i-2|$$

(b) Arg 
$$(z+1) \ge \frac{\pi}{4}$$

## 14. [3,1,3,3 marks]

Sho	ow that $(z - 1 - i)$ is a factor of $z^3 - 4z^2 + 6z - 4$ .
Wr	ite another complex factor of the cubic expression.
Fro	m parts a) and b) find a quadratic factor of the cubic expression.
Sho you	ow how to find the last factor of the cubic expression without the use of ar calculator.

15.	[2,3,2,1,2 marks]
	If $\mathbf{u} = \langle -2, 3, 1 \rangle$ and $\mathbf{v} = \langle 3, 1, -5 \rangle$ find:

(b)	the size of the angle between	u	and	v
-----	-------------------------------	---	-----	---

(c)	(u	+	V)		(u	-	V)
-----	----	---	----	--	----	---	----

(d)	the acute angle between	$\mathbf{v}$	and	the <i>x</i>	axis
-----	-------------------------	--------------	-----	--------------	------

e)	the acute angle between	u	and the	x - y	plane.

# 16. [11 marks]

A straight line drawn on the polar axes makes an angle of 30° with the positive x axis and passes through point A (6, 160°). B is also on the line and is 15 cm away from A. Find the two possible values of B.

# 17. [3,3,3,4 marks]

Solve each equation below for z without using your calculator.

(a)  $z^4 + 6z^2 + 5 = 0$ 

(b)  $(z + 5 + i)^2 = -9$ 

(c)  $3z - 4\overline{z} = 5 + 14i$ 

 $(d) \quad z + \frac{8}{z} = 4$
