Christ Church Grammar School

2021
TEST 1

MATHEMATICS SPECIALIST Year 12
Calculator-free

Your name _____ _

Teacher's name _____

Time and marks available

Reading Time:	4 minutes
Working time for this section:	40 minutes
Marks available:	42 marks

Materials required/recommended

To be provided by the supervisor

This Question/Answer Booklet
Formula Sheet

To be provided by the candidate

Standard items: pens (blue/black preferred), pencils (including coloured), sharpener, correction fluid/tape, eraser, ruler, highlighters

Special items: nil

Important note to candidates

No other items may be taken into the examination room. It is **your** responsibility to ensure that you do not have any unauthorised notes or other items of a non-personal nature in the examination room. If you have any unauthorised material with you, hand it to the supervisor **before** reading any further.

Instructions to candidates

1. The rules of conduct of the CCGS assessments are detailed in the Reporting and Assessment Policy. Sitting this assessment implies that you agree to abide by these rules.

2. Write your answers in this Question/Answer Booklet using a blue/black pen. Do not use erasable/gel pens.

3. Answer all questions.

4. You must be careful to confine your response to the specific question asked and to follow any instructions that are specified to a particular question.

5. Supplementary pages for the use of planning/continuing your answer to a question have been provided at the end of this Question/Answer booklet. If you use these pages to continue an answer, indicate at the original answer where the answer is continued, i.e. give the page number.

6. **Show all your working clearly**. Your working should be in sufficient detail to allow your answers to be checked readily and for marks to be awarded for reasoning. Incorrect answers given without supporting reasoning cannot be allocated any marks. For any question or part question worth more than two marks, valid working or justification is required to receive full marks. If you repeat an answer to any question, ensure that you cancel the answer you do not wish to have marked.

7. It is recommended that **you do not use pencil**, except in diagrams.

See next page

Question 1 **(6 marks)**

Given $z = x + yi$, sketch the locus in the complex plane given by

(a) $|z| = |z - 2 + 2i|$. (2 marks)

(b) $\arg(z - 1) = \frac{\pi}{2}$ (2 marks)

(c) Describe the locus of w if z describes a circle with centre $1 + 2i$ and radius of 3, when $w = 2z$. (2 marks)

See next page

Question 2 **(7 marks)**

(a) Write $\frac{1+i\sqrt{3}}{1+i}$ in the form $x + yi$, where x and y are real numbers. (2 marks)

(b) By expressing both $1 + i\sqrt{3}$ and $1 + i$ in polar form $r \operatorname{cis} \theta$, show that

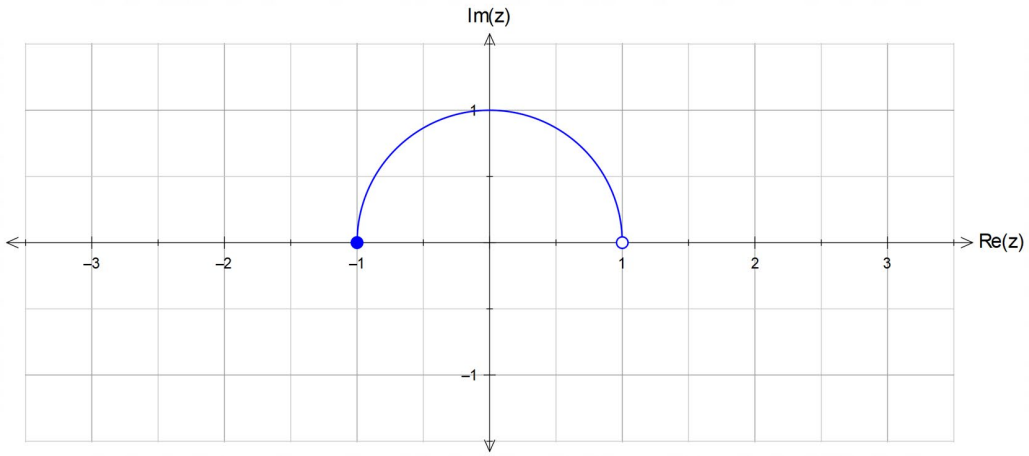
$$\frac{1+i\sqrt{3}}{1+i} = \sqrt{2}\left(\cos\left(\frac{\pi}{12}\right) + i\sin\left(\frac{\pi}{12}\right)\right).$$ (3 marks)

(c) Hence, using your answers from parts (a) and (b), determine the exact value of $\sin\left(\frac{\pi}{12}\right)$. (2 marks)

See next page

Question 3 **(5 marks)**

The diagram shows the locus of all points that satisfy the conditions $|z| = 1$ and $0 < \arg(z) \leq \pi$.

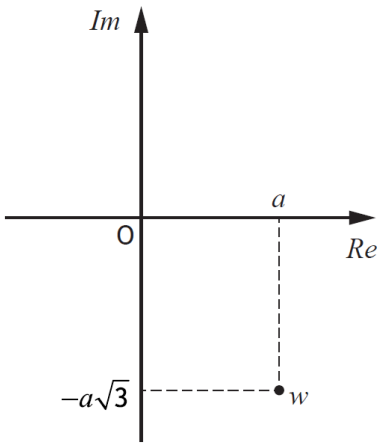


(a) Sketch on the same axes the locus of all points defined by $|z - 2| = 1$ and $0 < \arg(z - 2) \leq \pi$. (3 marks)

(b) Determine the maximum value of $\arg(z)$ for your answer in (a), and the exact value of $|z|$ at this point. (2 marks)

Question 4 **(10 marks)**

The complex number w has been plotted on an Argand diagram, as shown below.



(a) Express w in

(i) Cartesian form. (1 mark)

(ii) Polar form. (3 marks)

Question 4 continued

(b) The complex number z_1 is a root of $z^3 = w$, where

$$z_1 = k\left(\cos\left(\frac{\pi}{m}\right) + i\sin\left(\frac{\pi}{m}\right)\right) \qquad \text{for integers } k \text{ and } m.$$

Given that $a = 4$,

(i) Use de Moivre's theorem to obtain the values of k and m. (4 marks)

(ii) determine the remaining roots. (2 marks)

See next page

Question 5 **(7 marks)**

The complex number $z = 2 + i$ is a root of the polynomial equation $z^4 - 6z^3 + 16z^2 - 22z + q = 0$, where $q \in \mathbb{Z}$.

(a) State a second root of the equation. (1 mark)

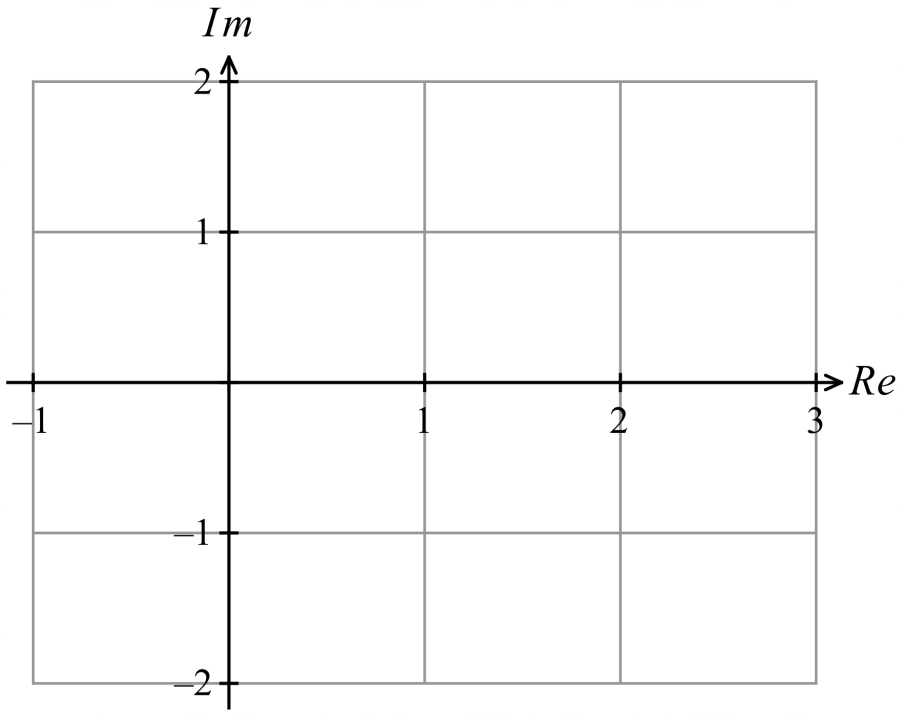
(b) Determine the value of q and hence or otherwise, solve the equation $f(z) = z^4 - 6z^3 + 16z^2 - 22z + q = 0$. (5 marks)

See next page

Question 5 continued

(c) Show the solutions to $z^4 - 6z^3 + 16z^2 - 22z + q = 0$ on an Argand diagram.

(1 mark)



See next page

Question 6 **(7 marks)**

(a) Two of the solutions to the equation $z^n = 1, n \in \mathbb{Z}^+$, are $\text{cis}\frac{\pi}{2}$ and $\text{cis}\frac{\pi}{3}$.

(i) State another solution to the equation. (1 mark)

(ii) Determine, with reasons, the minimum value of n. (3 marks)

(b) If $z = \text{cis}\left(\frac{\pi}{4}\right)$, determine the sum of the geometric series $1 + z_1 + z_2 + z_3 + \cdots + z_{24}$ and explain your answer. (3 marks)
